

BeetleTracker description

On BeetleTracker you can test apps or websites and report issue you encounter.

Behind the developers from the app or the website will solve the issues.

BeetleTracker Overview

BeetleTracker

Definitions

Team: Is a workspace create by an admin, that users can join via an invitation.

Organisation: Is a society with many teams.

Bug: Bugs are problems or issues meet in a project.

Users: Users are the protagonistes. We will use four main user.

Custom / Tester / Debugger / Admin

Definitions next part

Custom: Is a user with a specific role define by the admin.

Tester: Testers can report bug from a project there are allowed to.

Debugger: Debuggers can report and fixed bugs from project there are working on.

Admin: The admin is the chief, he has to manage the project. He does have full power.

Stories

Users:

As a user, I can sign up or log in on BeetleTracker so I can choose between create / join a team or enter on an existing team's workspace.

As a user, if I am choosing to create a team, I become the admin and I have full permissions on the team.

As a user, if I have received an invitation, I can join the team and I will be assigned to the role the admin has chosen for me.

As a user, if I have been assigned as a tester, I can post bugs that I have found in the team workspace.

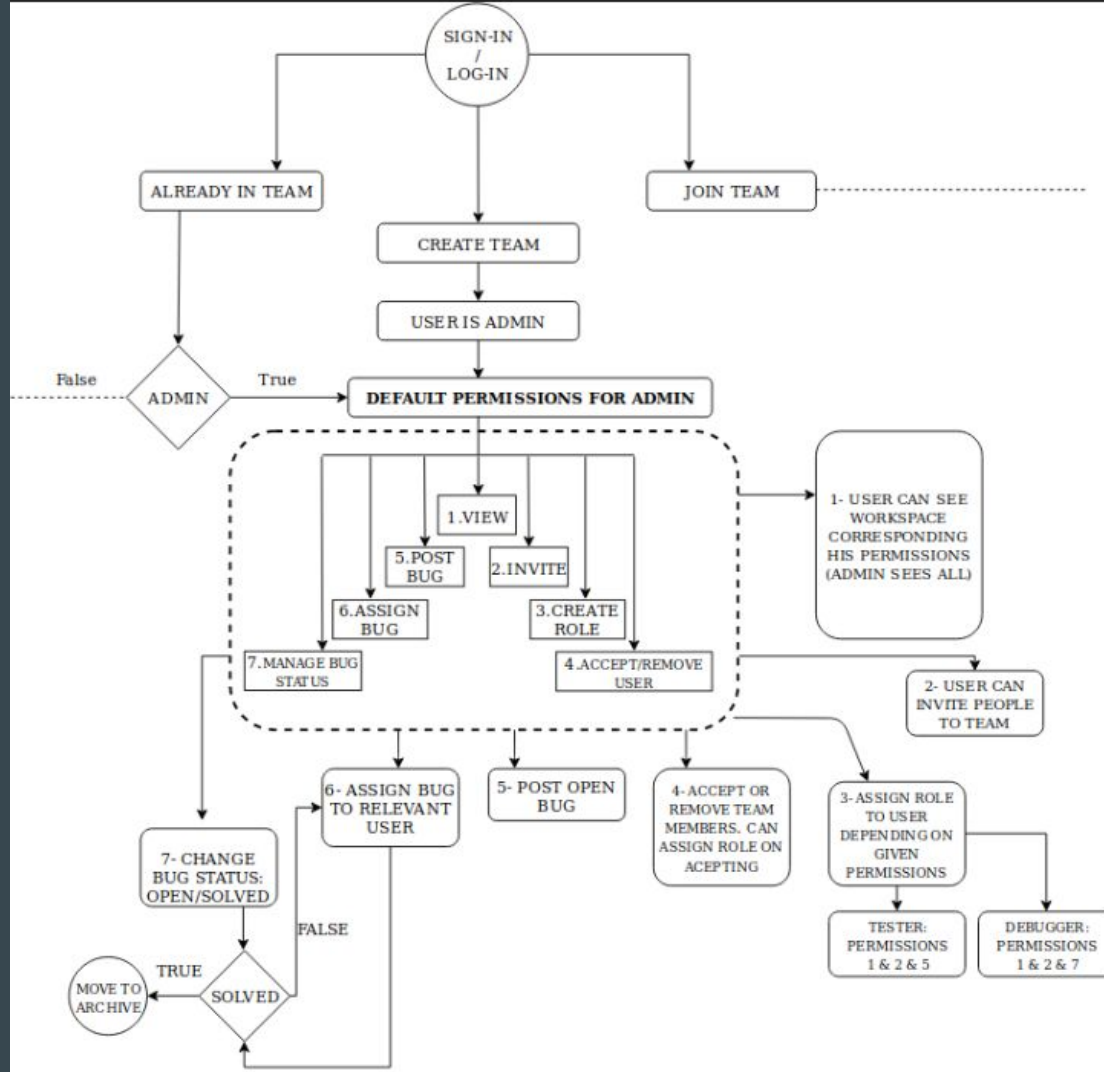

As a user, if I have been assigned as a debugger, I can solve bugs which have been posted on the team workspace.

Stories

Permissions:

- As “View” permission, I allow users to see the team’s workspace.
- As “Invite” permission, I allow users to invite external people to the team.
- As “Create Role” permission, I allow users to create roles with determined permissions tied to them.
- As “Accept / Remove User” permission, I allow users to confirm users joining the team and I allow users to remove other users from the team.
- As “Post Bug” permission, I allow users to place bugs on the team’s workspace.
- As “Assign Bug” permission, I allow users to assign bugs to pertinent users to solve them.
- As “Manage Bug Status” permission, I allow users to change the bugs status from open to solve (and vice versa).
